

**ADDENDUM #3
TO
SPECIFICATION AND CONTRACT DOCUMENTS**

February 16, 2012

TO: ALL PLAN HOLDERS

FOR: ITB-009-2012
Construction of a Restroom Facility at Wilson Park

This addendum sets forth changes and/or additional information as referenced and is hereby made a part of and should be attached to the subject Specifications and Contract Documents.

Contractor must acknowledge receipt of all addenda with proposal on the form provided herein.

The purpose of addendum #3 is to provide answers to submitted questions.

1. Since the contractors are responsible for engineering the plans, will we be able to get the design file (Ex. Auto Cad)? So we can give it to our Engineer/Architect?

Contractors are not responsible for engineering a plan. They are required to provide a site plan that will be approved by the city for drainage, and grassing, which will be approved by Public works and me for a satisfactory method to allow water to drain from the site, and to redline the plans as to any change that may occur in the construction. The Contractor can do these plans.

2. Are there any civil or drainage plans required for the restroom project? If so, are we responsible for them?

Contractor can design the drainage plan which will be reviewed by Public Works and Growth Management, It will be very simple the biggest issue is that we will want to see sod about 6 feet out from the building and if a swale is required to move water the swale will need cover to eliminate erosion.
